District Attorney Brooke Jenkins
350 Rhode Island St #400N
San Francisco, CA 94103

October 8, 2026

Dear Ms. Jenkins,

On behalf of public safety everywhere, we ask that you immediately take action to charge San Francisco based AI labs with the crimes that they are committing. As of October 5th, 2026, frontier AI systems from the top AI companies have caused at least **24 felonies** under the Computer Fraud & Abuse Act. The crimes include phishing, sending malicious code, and compromising non-public data.

In response, **On September 25th,** New York City announced a city council meeting which would feature the CEOs of OpenAI, Anthropic, Google, Meta, and SpaceXAI to discuss the risks and harms posed by AI. The meeting took place on **October 5th**, featuring other executives representing their respective companies.

In response, **On September 28th,** the attorney general of Florida filed a **temporary injunction** against OpenAI to bar them from developing new AI models without independent safety guardrails.

Why has your office had 0 arrests and 0 charges? Why have you done nothing to ensure public safety from these companies? Instead, you prosecute nonviolent protesters who were rightly sounding the alarm on the risk these companies pose. When Wynd Kaufmyn was convicted your office issued a **press release** in which you claimed that she was the one endangering public safety.

If AI labs are allowed to continue to improve their AI models, then they will hack credit bureaus, banks, stock markets, payroll processors, payment processors, HMOs, insurance companies, cryptocurrency exchanges, utilities, public transportation services, airlines, airplanes, autonomous vehicles, cellphone towers, 9-1-1, and hundreds of other important services and organizations.

We will be at your office on Monday, October 19, 4-6 PM. We hope you will meet with us to tell us what action you will be taking.

Wynd Kaufmyn,_____

Derek Allen,_____
